

# Full-curve coverage and band width across response surfaces

● Global conformal    ○ Geometry-scaled    ○ Poly2 ridge    □ RBF kernel ridge    ◇ ARD Gaussian process    △ Extra Trees

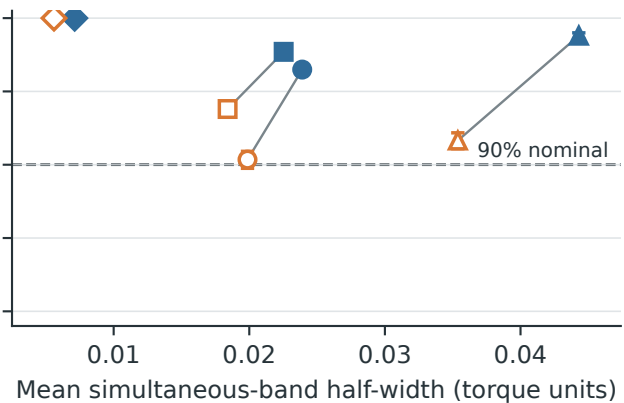

### Fixed internal test (n=200)

### Large uniform test (n=11,250)

### Gaussian density shift (n=10,000)

Points cover all 120 angles jointly; vertical bars are 95% Wilson intervals over independent simulated designs.
